

## THE TRADE NETWORK CONNECTOR

CONNECTING BANKS AND CORPORATE CLIENTS THROUGH A SEAMLESS AND SECURE DECENTRALISED NETWORK

Digitise and enhance your trade finance business with Contour, the **world's fastest growing digital trade network** that is transforming the future of trade finance.

Realise the benefits of **digitalisation** from the global trade ecosystem on one common, decentralised network

### HOW DOES IT WORK?

Contour and Finastra are transforming the Letter of Credit (LC) process by managing the entire end-to-end LC process in one collaborative workflow.

#### GO PAPERLESS

Contour digitises the trade finance process by removing the need for paper. Adopt digital documents, such as electronic Bills of Lading, and securely share the data from third-party providers either directly or through APIs.

#### COLLABORATE ON ONE PLATFORM

Manage all your external corporate client communications on a single platform, improving customer experience and lowering your cost to serve.

#### PRIVATE & SECURE

Receive and send instructions through our enterprise-grade security infrastructure with sophisticated user management features, providing full data confidentiality and control.

### SYNCHRONISE WITH THE TRADE NETWORK CONNECTOR

Synchronise your bank's LC transactional workflows with Contour's network of banks and corporates through Finastra's FusionFabric.cloud.

## KEY BENEFITS

OBTAIN **SPEED**, **SECURITY**, AND **EFFICIENCY** WHEN PROCESSING LETTER OF CREDIT (LC) TRANSACTIONS.

### INSTANT COMMUNICATION

Connect directly with your bank's current installation of Finastra's Fusion Trade Innovation and communicate intuitively with banks and corporates on Contour's network.

### ENHANCED CUSTOMER OFFERING

Enhance your customer service levels by providing an innovative and digital solution with improved response times.

### REAL-TIME DATA FLOW

Access more information than ever before with real-time synchronised data from all transaction participants.

### PRIVATE & SECURE

Maintain security and privacy by using the latest in enterprise blockchain technology.

### SEAMLESS DATA INTEGRATION

Integrate data seamlessly from external trading parties into your back-office system, shortening the processing time of data re-entry.

### DE-RISK PROCESS

Reduce operations risk with a fully integrated solution that doesn't require third-party portals with separate controls and data.

## FREQUENTLY ASKED QUESTIONS

### What workflows will this connector support?

In this first version, the connector will support the LC application, issuance, and amendment workflows.

We are working together with our partners to widen the support for other processes such as LC presentation and other electronic documentation providers, such as eBL providers.

### Do I need a separate license to activate the Trade Network Connector?

No, your current Contour license supports both API access and access through the Contour portal.

Please contact Finastra for connectivity with your trade back-office application.

### Is this ready for production?

The current V1.0 integration is ready for production and we welcome clients to join the network.

As the solution evolves, we appreciate your comments and feedback to explore how Contour and Finastra teams can help support your business further.
